

5.1

1. Two aims--the recovery of the American economy and the modernization of America into a military power--were in the president's mind when he assumed his office. The drop in unemployment figures and inflation, and the increase in the GNP testifies to his success in the first. But our increased involvement in international conflict without any clear set of political goals indicates less success with the second. Nevertheless, increases in the military budget and a good deal of saber rattling pleased the American voter.

1R. Two aims were in the president's mind when he assumed his office, the recovery of the American economy and the modernization of America into a military power. His success in the first is testified by the drop in unemployment figures and inflation, and the increase in the GNP. His less success with the second is indicated by our increase involvement in international conflict without any clear set of political goals. Nevertheless, the American voter was pleased by a good deal of saber rattling and increases in the military budget.

1A. When the president assumed office, he had two aims--the recovery of the American economy and the modernization of America into a military power. He succeeded in the first as testified to by the drop in unemployment figures and inflation, and the increase in the GNP. But he had less success with the second, as indicated by our increased involvement in international conflict without any clear set of political goals. Nevertheless, the American voter was pleased by vast increases in the military budget and a good deal of saber rattling.

2. The components of Abco's profitability, particularly growth in Asian markets, will be highlighted in our report to demonstrate its advantages versus competitors.

2R. In our report, in order to demonstrate Abco's advantages versus competitors, we will highlight the company's growth in Asian markets and other components of their profitability. Several components of profitability serve as a basis for this analysis: product type, end-use, distribution channels, etc. According to our projections, a proper development of distribution channels in China provide likely growth prospects for Abco's newest product lines. This introduction of new products will require the support of a range of innovative strategies.

5.2

R.

In their natural states, animals cannot create and communicate a new message to fit a new experience. When animals communicate messages, they are limited by their genetic code to the number and kind of messages. For example, bees communicate information only about distance, direction, source, and richness of pollen in flowers. In all significant respects, animals of the same species have a limited repertoire of messages delivered in the same way, for generation after generation.
